Letter of Recommendation

To Whom It May Concern:

Our team has collaborated and executed on work with BKB Construction on a number of diverse projects in California, Colorado, and Texas. BKB has also partnered and assisted with the due diligence process in multiple states. Based on our experiences with BKB team, I am pleased to provide this letter of recommendation for their group.

BKB Construction has illustrated their attention to detail, high quality of work, and safety during the course of executed work with our group. BKB has illustrated their high-level construction knowledge on multiple complex projects, before and during execution of work. They are a group that always strives to ensure that the work is done correctly, efficiently, and on schedule. Their company policy is to strive for the highest safety standards, and that is reflected in the field, in our experience, during the execution of work. They have met our expectations and always been willing to work around potential obstacles and communicate effectively through the process. The company has several long-term high-level tradespeople on staff, which sets them apart from many other general contractors, and translates into a better consistent final product from state to state as we have executed work with their group.

Based on my dealings with the BKB Construction team, they have always exhibited a high-level of ethics, reliability, and fairness.

Should you have any further questions, I'm available to discuss their performance further.

Thanks

Al Clarke
